

# SEWER-SAVER®

## BENEFITS...

- ✓ Reduced I&I from mower damaged Cleanout Adaptors.
- ✓ Reduced I&I from vehicle damaged Cleanout Risers. (typically broken @ sanitary tee)
- ✓ Reduced risk of SSO effluent issues during periods of wet weather.
- ✓ Reduced liability associated from pedestrians tripping on Cleanout Risers.
- ✓ Reduced time mowing *around* Cleanouts.
- ✓ No unsightly Sewer Cleanout Risers.
- ✓ Cleanout can be easily located / accessed for maintenance.
- ✓ Cost effective, rugged, practical.

## HOW IT WORKS...

1. Dig around existing Cleanout.
2. Cut PVC riser to desired level.
3. Install adaptor with flat plug.
4. Install Sewer-Saver® over Cleanout.

Cleanout is: Protected against lateral movement, vertical loading and can be easily located.

*Alternately, Sewer-Saver can be simply “dropped” over existing Cleanouts in ROW’s to protect against such threats as boom mowers.*

*“Satisfaction guaranteed or your money back.”*
